3.	Drinking Water Field Operations Branch, Santa Rosa	Staff	576-2145	

If the above personnel cannot be reached, contact:

Office of Emergency Services (24 hrs) at (916) 262-1621

Notification Plan

On the attached sheet, describe methods or combinations of methods to be used (door-to-door, phone, etc.) For each section of your plan, give an estimate of the time required, necessary personnel, estimated coverage, etc. Consideration must be given to non-English speaking groups, persons not home during the day, and outlying water users.

WATER QUALITY EMERGENCY NOTIFICATION PLAN:

Please describe your water system's plan for emergency notification to all water users:

In the event an emergency notification is necessary, the following procedure will be followed:

Each member of the Board of Directors is in possession of a customer call list broken down by tank source in the distribution system, occupant name, address, and phone number.

The PLMWC Board of Directors and/or appointed volunteers are assigned sections of the "call list", thus minimizing the time required to call 110 customers. Calls are made until all customers are contacted. In the event phone contact is not possible, a written notice or personal contact will be used to inform the customers of an emergency.

Date: 4/14/05

Report prepared by: Lee E. Tolbert – VP / Board of Directors
